

Q3 FINANCIAL REPORT 2023

Norsk Solar has experienced some very intensive and positive months since I assumed leadership 6 months ago. We have a dedicated team which has passed some important milestones that I am happy to elaborate on in our Q3 financial report.

The company is evolving from being a solar energy provider to a technologically agnostic independent renewable power producer. We believe that this is required to achieve our vision of supplying our customers with renewable energy for up to 100% of their energy needs. Norsk Solar has increased its focus on scale, either through single larger projects or through a portfolio approach to smaller projects. Norsk Solar will continue to focus on Vietnam, Brazil, and South Africa as core markets.

As of 16th of November the new company name is:

Brand promise:

THE SHIFT TO RENEWABLE ENERGY MADE EFFORTLESS

For the remaining part of our Q3 financial report, we will be using our new name Norsk Renewables.

Markets

In Q3 Norsk Renewables embarked on new challenges for the whole company, experiencing notable growth in the pipeline, and strengthening our foothold in the main markets of Brazil, South Africa and Vietnam. Despite global challenges posed by the macroeconomic environment and the increase in interest rates, our agile approach has allowed us to navigate these headwinds effectively.

In Brazil we have expanded our outreach and started the operation of our first asset, the 18 MW Origo I project. We have started construction of the 9 MW Origo II project. The projects are both in partnership with "NIC" (Nordic Impact Cooperation) where Norsk Renewables owns 34%, Norfund 33% and Finnfund 33%. In addition to the projects already mentioned we have a development

portfolio of 50 MW agreed with our offtake partner, Origo Energy. We are working on including additional development projects in the Brazilian pipeline.

We have 11MW in operation in Vietnam. This is owned by the NIC platform. We are strengthening our ability to grow further through a joint development agreement with Copper Mountain Energy (CME).

We (through the NIC platform) have entered into a non-binding Term Sheet for a potential significant minority investment in an established Vietnamese IPP. This investment will provide access to both operational assets as well as a significant development portfolio in Southeast Asia. I am very excited about this transaction seeing that it will create opportunities for us to leverage our expertise, technology, and resources to strengthen the renewable landscape and reduce CO2 in the combat of climate change. With the growing energy demand and commitment to renewable energy sources, Vietnam provides a promising environment for such investments.

In South Africa we see significant organic and inorganic growth both through Norsk Renewables development and the strengthening of our relationship with Valinor, now being 53% shareholder. Norsk Renewables has over the last year developed a portfolio of solar power projects in South Africa, whereby the largest and most mature to date is a 315 MW solar PV project. Norsk Renewables has secured land lease rights, completed the initial Environmental Impact Assessment and is now working on the in-depth Environmental & Social Impact Assessment. The project has received its Cost Estimation Letter ("CEL") from the authorities, which is an important milestone in the viability of the project.

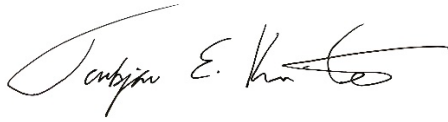

Valinor has developed a renewable energy portfolio in South Africa together with its local partner Musina Flair Generation. The first phase of this greenfield development consists of a 300 MW solar PV project and a 300 MW wind project. These projects have secured land lease rights, 4 out of 5 sites have received Environmental Authorizations and are awaiting their CEL. I am proud that Norsk Renewables, Valinor and Musina Flair Generation have agreed on a term sheet for combining these two projects with Norsk Renewables' 315 MW solar project into a joint venture. The transaction is planned as an equity-in-kind settlement which will see the creation of a joint development company between the partners in South Africa. Norsk Renewables will, subject to due diligence and finalization of the transaction, own 26% of the JV. We have signed a Memorandum of Understanding with a sister company in Valinor Group, Norsk Vind, which is Norway's largest private wind power company. Norsk Vind will provide important competence, experience and capacity within the wind domain.

To evaluate the best strategic and financial options for Norsk Renewables going forward, we have engaged Pareto Securities ("Pareto"). We will explore different structures to realize our project pipeline described above and have initiated discussions with potential industrial, strategic, and financial partners.

Looking ahead, we remain optimistic about our prospects for the remainder of the fiscal year and beyond. Our focus on project implementation, strategic choices, financing, and market knowledge will continue to be a driving force behind our way forward.

In conclusion, I want to emphasize our confidence in the strategic direction of the company. The results achieved in Q3 are a testament to the hard work and dedication of our team, as well as the

strength of our business model. We appreciate the trust placed in us by our shareholders and we are committed to delivering long-term value.

A handwritten signature in black ink, reading "Torbjørn E. Kirkeby-Garstad". The signature is fluid and cursive, with a prominent initial 'T' and a long horizontal stroke at the end.

CEO, Norsk Solar, now Norsk Renewables

Torbjørn Elliot Kirkeby-Garstad

Financial summary Q3 2023

– Norsk Renewables Q3 Financial Report

Consolidated statement of profit & loss

Group profit in Q3 shows a loss of NOK 18,6 million. The loss was NOK 9 million lower than the same period in 2022, which derives mainly from lower other operating expenses. This is mainly due to the impairment of the Semypolky plant recognized in 2022.

EBITDA for Q3 was minus NOK 13.4 million compared to minus NOK 21.8 million in the same period last year.

Year to date, the Group incurred a loss of NOK 43.5 million compared to a loss of NOK 47.7 million in the same period last year.

Revenue

The company derives its income from sale of solar power under long-term power purchase agreements, as well as management and development services. During Q3 of 2023, revenue consisted mainly of the sale of power derived from the Semypolky plant in Ukraine, as well as management fees.

The plant in Ukraine is fully operational, but the situation remains challenging. The plant is affected by lower receipts on invoiced revenues. As a precaution therefore, Norsk Renewables has chosen to continuously write off the outstanding accounts receivable from the Ukrainian plant.

Operating expenses

Total operating expenses in Norsk Renewables consists mainly of personnel expenses and other operating expenses.

In 2022, Norsk Renewables received a grant from Norad for up to NOK 20 million to help support our development work in South Africa and Vietnam. The coverage period is 2022 – 2024 and the grants are booked as cost reductions in the relevant period.

Salaries in Q3 before grant reduction was NOK 12 million. An increase of NOK 3.7 million compared to Q3 2022 as the organization has increased both on HQ and country level. There is booked a reduction of NOK 7.5 million per Q3 which reflects provision for Norad grant coverage for activities in Vietnam and South Africa for parts of 2022 and year to date 2023.

Total operating expenses was NOK 8.7 million, a decrease of NOK 9.4 million from Q3 2022. The decrease from 2022 is mainly related to the write off a loan related to the development of the plant in Ukraina. There is booked a reduction of NOK 2.0 million per Q3 which reflects provision for Norad grant coverage.

Financial items

Net financial expenses amount to NOK 2,8 million in Q3 2023 compared to NOK 1.7 million the same period last year.

Consolidated statement of financial position

– Norsk Renewables Q3 Financial Report

Fixed assets

Reduction of fixed assets in Q3 is related to depreciations. The changes in PP&E includes currency translation changes.

In Q3 2022 the investments in Nordic Impact Cooperation were classified as Investments in shares, while it has been classified as Investments in associated companies in 2023.

Total current assets

Decrease in current assets is mainly due to the received repayment of previous loans to associated companies.

Total shareholder equity

Net equity is reduced by the loss in the first half of 2023 and translation effects.

Total liabilities

Other long-term liabilities are increased by drawdowns of the NOK 100 million credit facility at Sparebank 1 SR-Bank.

Current liabilities are mainly reduced by the repayment of the outstanding on the NOK 50 million credit facility at Sparebank 1 SR-Bank

Subsequent events

In November 2023, Norsk Renewables received approval for a new grant from Norad for up to NOK 12 million for development work in Africa and Southeast Asia.

In Q4 2023, the partners in NIC agreed to invest in the Órigo II project in Brazil. The transaction is expected to close in 2023.

In November 2023, Norsk Renewables signed a term sheet with Valinor and Musina Flair Generation for combination and joint development of certain of its respective assets in South Africa. The transaction is expected to close in 2024.

Furthermore, in Q4 2023, the NIC platform with Norfund and Finnfund has been expanded in Vietnam with the signing of a term sheet for acquisition of a significant minority shareholding in an independent power producer in Vietnam. The transaction is expected to close in 2024.

In order to evaluate the best strategic and financial options for the Company going forward, Norsk Renewables has engaged Pareto Securities as a financial advisor. The company will explore different structures to realize the project pipeline described above.

Norsk Solar was renamed Norsk Renewables in an extraordinary general assembly on the 16th November 2023.

Notes to the consolidated financial statements

Note 1 – Corporate information

Norsk Solar AS (now renamed Norsk Renewables) was founded in 2017 and is incorporated and domiciled in Norway. The address of its registered office is Haakon VII's gate 8, NO-4005 Stavanger, Norway.

Norsk Renewables AS ("the company"), its subsidiaries and investments in associated companies ("the Group"), develops, builds, owns and operates renewable power plants for utility-scale and corporate off-takers in high growth markets.

The company is listed on the stock exchange Euronext Growth in Oslo under the ticker "NSOL".

The consolidated financial statements for the third quarter of 2023 were authorized for issue in accordance with a resolution by the Board of Directors on November 28th, 2023.

Note 2 – Accounting principles

These condensed interim consolidated financial statements are prepared in accordance with recognition and measurement principles consistent with Norwegian Accounting Act and generally accepted accounting principles in Norway. These condensed interim consolidated financial statements are unaudited. They are condensed and do not include all information, and notes required by the Norwegian Accounting Act and generally accepted accounting principles in Norway for a complete set of consolidated financial statements.

The presentation currency of the Group is Norwegian kroner (NOK).

These condensed interim consolidated financials should be read in conjunction with the annual consolidated financial statements for 2022.

Note 3 – Revenue

The Group derives its revenue from contracts with customers for the transfer of goods and services over time in the following major areas of operations.

Per area of operation:	Q3 2023	Q3 2022	YTD 2023	YTD 2022	2022
Solar Energy	5,789	4,349	13,059	11,796	12,479
Government grant	0	0	0	0	660
Other	235	5,756	697	5,753	598
Total	6,024	10,104	13,756	17,549	13,737

Per geographic market:	Q3 2023	Q3 2022	YTD 2023	YTD 2022	2022
Norway	229	5,756	691	5,753	1,258
Europe	5,795	3,564	13,065	9,313	9,996
Asia	0	785	0	2,483	2,483
Total	6,024	10,104	13,756	17,549	13,737

In 2022 Nordic Impact Cooperation became an associated company of Norsk Renewables AS, also making Norsk Solar Vietnam Co Ltd an associated company. For 2023 the revenue from Asia is thus accounted for in the Income from Associates.

In Q3 2022 Norsk Renewables recognized NOK 5.3 million in gross revenue and cost related to the sale of solar PV modules to Nordic Impact Cooperation AS for the construction of the Brazil 18 MW project. In Q4 this revenue and cost was presented on a net basis due to a consideration of control and risk.

Note 4 – Property, plant and equipment

Up until 30 September 2023, Property, Plant and Equipment (PP&E) have been affected by depreciation expenses of NOK 7.2 million. The changes in PP&E includes currency translation changes.

Note 5 – Impairment

The situation in Ukraine per end of September 2023 continues to remain very challenging and the outcome of the situation and the impact on the assets in Ukraine remains highly uncertain. There has been no damage to the plant in Ukraine and it is still fully operating. We cannot see any factors which have altered our impairment test done in Q2 2022.

The Group has considered the Trade Receivables related to the off-taker of the solar plant in Semypolky. The Ukrainian off-taker has since March 2022 paid on average 50 % of the revenues generated on the defined Feed-in-Tariff for the asset. Norsk Renewables continues its cautious approach and recognizes a credit loss provision for the full amount of unpaid invoices. This results in an additional impairment of NOK 7.9 million being booked as Other operating expenses YTD 2023.

Note 6 – Financing

On February 13, 2023, Norsk Renewables secured a NOK 100 million debt facility from Sparebank1 SR-Bank. This replaced the previous NOK 50 million facility from the bank. Changes in non-current and current liabilities YTD are recognized by the repayment of the NOK 38 million drawn of the NOK 50 million facility early January. Non-current liabilities are increased by draw downs on the NOK 100 million debt facility in relation to project developments.

The maturity date for the bridge financing is December 2024.

Non-current liabilities consist of non-recourse financing from NEFCO in connection to the construction of the solar plant in Semypolky, Ukraine. The maturity date for the non-recourse finance is December 2029.

Non-current liabilities also consist of loan to Innovasjon Norge.

Debt to financial institutions classified as current liabilities per 30 September, consists of loan repayments to NEFCO and Innovasjon Norge that are due within one year.

Note 7 – List of subsidiaries

The following subsidiaries are included in the consolidated financial statement:

Subsidiary	Country of incorporation	Sep 30, 2023 Interest/voting power	Dec 31, 2022 Interest/voting power
Norsk Solar Nicaragua	Nicaragua	99.0%	99.0%
Semypolky Solar Ltd	UK	64.3%	64.3%
Semypolky Solar LLC	Ukraine	45.0%	45.0%
Semypolky Solar 2 LLC	Ukraine	45.0%	45.0%
Norsk Solar EPC AS	Norway	100.0%	100.0%
Norsk Solar Hungary kFT	Hungary	51.0%	51.0%
Norsk Solar Brasil Ltda.	Brasil	100.0%	100.0%
Norsk Solar Ukraine LLC	Ukraine	N/A	100.0%
Norsk Solar Maldives PVT Ltd	Maldives	100.0%	100.0%
Norsk Solar South Africa (PYT) Ltd.	South Africa	100.0%	100.0%
Norsk Solar AS Vietnam Ltd Company	Vietnam	100.0%	100.0%
Norsk Solar Spain S.L.	Spain	100.0%	100.0%
Norsk Solar Brasil 2 S.A	Brasil	100.0%	0.0%
UFV MG XXIV EF LTDA	Brasil	100.0%	0.0%
UFV MG V EF LTDA	Brasil	100.0%	0.0%

Interest/voting power in indirectly held subsidiaries are shown with interest/voting power adjusted for ownership percentage via subsidiary.

Norsk Solar Ukraine LLC was liquidated per July 3rd.

The process of liquidating Norsk Solar Nicaragua and Norsk Solar Maldives is still under progress.

Norsk Solar Vietnam Ltd. Company and Norsk Solar Spain S.L. were established at the end of 2022 and were not eliminated in the annual report due to little to no activity in the year. The subsidiaries have been eliminated in the consolidated financials for Q3.

Note 8 – Interest in associated companies

The consolidated financial statements include the Group's share of profit/loss from associated companies where the Group has significant influence, accounted for using the equity method. Under the equity method, the investment is initially recognised at cost and subsequently adjusted for further investments, distributions, and the Group's share of the net income from the net investment.

The company decided on two capital increases in the first quarter of 2023 to support the investments in Brasil. These were registered in Brønnøysund on 28 March and 10 May 2023.

Associated company	Country of incorporation	Sep 30, 2023 Interest/voting power	Dec 31, 2022 Interest/voting power
Nordic Impact Cooperation AS	Norway	33.92%	33.92%

Associated company, YTD 2023 100%	EBIT	Net profit	Total Assets	Total Equity
Nordic Impact Cooperation Group	- 743	- 2 061	352 621	150 181

*NIC Group consists of Nordic Impact Cooperation AS, and its wholly owned subsidiaries Norsk Solar Vietnam Ltd. (UK), Norsk Solar Vietnam Co. Ltd (Vietnam), Norsk Solar Brasil 1 S.A. (Brasil), UFV MG XXVI EF LTDA (Brasil), UFV MG XXVII EF LTDA (Brasil), UFV MG XXVIII EF LTDA (Brasil), UFV MG XXX EF LTDA (Brasil), UFV MG XXXIV EF LTDA (Brasil) and UFV MG XXXV EF LTDA (Brasil).

Note 12 – Subsequent events

- In November 2023, Norsk Renewables made its first move beyond solar energy with the joint development agreement with Valinor and Musina Flair Generation in South Africa, which also adds wind resources to our portfolio. The transaction is expected to close in 2024.
- In November 2023, Norsk Renewables along with Norfund and Finnfund, via the NIC platform, signed a term sheet for a significant shareholding in an independent power producer in Vietnam. The transaction is expected to close in 2024.
- In Q4 2023, the partners in NIC made a final investment decision in Órigo II in Brazil.
- In November 2023, Norsk Renewables received approval for a new grant from Norad for up to NOK 12 million for development work in Africa and Southeast Asia.
